ABDURRAHMAN KHAN

Software Engineer | Frontend & React Native Developer

+91-9981993064 | abdurrahmankhan1429@gmail.com | Bangalore, Karnataka, India

linkedin.com/in/abdurrahmankhan11 | github.com/Abdurrahmankhan11

PROFESSIONAL SUMMARY

Computer Science Engineering graduate (B.Tech, 2026) and Software Development Intern with hands-on experience building web and cross-platform mobile applications using React.js, React Native, and JavaScript (ES6+). Integrated 100+ REST API endpoints and implemented token-based authentication, RBAC, and Firebase Cloud Messaging. Published independent research on requirement-grounded LLM agents for functional testing of React applications.

TECHNICAL SKILLS

Frontend & Mobile: React.js, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Vite, React Router DOM, shadcn/ui, Context API, Responsive Design, ApexCharts

APIs, Real-Time & Security: REST APIs, Axios, WebSockets, Firebase Cloud Messaging (FCM), Token-Based Authentication, Protected Routes, RBAC, Razorpay Payment & Subscription APIs

Backend & Databases: Python, Django, MySQL, SQL

Tools & Platforms: Git, GitHub, Vercel, Postman, Thunder Client, VS Code, Figma, Canva, npm

PROFESSIONAL EXPERIENCE

Software Development Intern | Ethical Intelligence, Bhopal, India **Jan 2026 – Jul 2026**

- Developed responsive web and mobile interfaces with React.js, React Native, and Tailwind CSS across device sizes.
- Integrated 100+ REST API endpoints using Axios, with structured payload handling, loading states, and error handling.
- Implemented token-based authentication, protected routes, and RBAC flows; added Firebase Cloud Messaging push alerts.
- Built reusable React and React Native components to enable consistent, scalable feature development.

Software Development Trainee | Ethical Intelligence, Bhopal, India **Jun 2025 – Dec 2025**

- Completed software-development training covering coding exercises, team projects, and assigned development tasks.
- Built React.js and React Native interfaces and integrated REST APIs via Axios with structured error-state handling.

PROJECTS

LegalFlow — Advocate & Client Management System | *React.js, Vite, Tailwind CSS, Axios, RBAC, REST APIs*

Built a role-based legal-tech web application with case management, hearing scheduling, document upload, payment tracking, client records, and API error handling.

Driverify — Driver Booking Mobile Application | *React Native, REST APIs, Firebase FCM, Token-Based Authentication*

Built a cross-platform driver-booking app supporting multiple trip types, real-time push notifications, and protected navigation.

WeMess — Social Media Mobile Application | *React Native, REST APIs, WebSockets, Firebase FCM*

Built a social media app with feeds, profiles, search, WebSocket real-time chat, notifications, and token-based sessions.

School Management System | *React.js, Vite, Tailwind CSS, shadcn/ui, ApexCharts, Razorpay API, RBAC*

Built role-based dashboards with analytics, protected routes, and Razorpay-based fee payment workflows.

EDUCATION

Bachelor of Technology — Computer Science & Engineering **2022 – 2026**

Barkatullah University Institute of Technology, Bhopal, M.P. | CGPA: 7.78 / 10

Coursework: Data Structures & Algorithms, DBMS, Software Engineering, Machine Learning, OOP

RESEARCH & PUBLICATIONS

Requirement-Grounded LLM Agents for Functional Testing of React Applications **Sep 2026**

- Designed a controlled study protocol evaluating requirement-grounded LLM agents for functional testing of React apps.
- Defined a benchmark of 3 applications, 24 requirements, 50 atomic behaviors, and 12 single-fault mutant specifications.

Published on Zenodo | DOI: 10.5281/zenodo.23033997
